4. Claims 1-25 and 29 are allowed.

The prior art of record fails to teach in combination as claimed a method and apparatus for measuring the effective capacitance across a biosensor cell having a first conductor connection and a second conductor connection, the biosensor cell configured for use in a biosensor to receive a sample having a volume. This includes applying a sine wave having a determined frequency to the first conductor connection of the biosensor cell to produce an AC signal. Shifting the phase of the AC signal. Generating a square wave synchronous with said
